Freedom of the press

liberate yourself from ironing drudgery!

822343 • £186.84 • Domena Steam Press with Steam Boost & Anti-Scale Protection • QVC Price ~~£205.50~~

For many of us, ironing is one of those tasks that never seem to end! So it's good news that with Domena's steam press, you can get all your ironing done in a fraction of the time. Boasting continuous steam output and an aluminium hotplate at least six times the size of a regular iron, it will cut through creases in no time!

The Domena press has a normal steam output of 80-90g per minute, and will steam continuously for as long as you require. For stubborn creases, there's a steam boost function producing up to 130g per minute for about 15 seconds.

The steam is produced in a dedicated generator unit housed beneath the ironing board. Because it rises from underneath the ironing surface, the steam penetrates the fabric to ensure maximum ironing efficiency - meaning less work for you!

The steam-making process also incorporates anti-scale protection, as the Domena's water reservoir contains an anti-scale cartridge that colours as it gets used up. This makes it easy for you to tell when it needs changing, helping you prolong the life of your press.

Features at a glance:

2200W
Large aluminium hotplate (about 66cm (26") by 25cm (10"))
Continuous steam
750ml reservoir capacity
Auto shut-off when closed
Anti-scale protection
Steam output: 80-90g/minute
Steam boost: 130g/minute
Comes with full instructional video

Ironing large items such as sheets can be really tedious and time-consuming. Not with the Domena! Unlike many models, this press opens right out so you can place the fabric you're ironing underneath the hotplate, right at the back of the ironing surface - maximising the space available.

Discover the many advantages of the Domena steam press, and find that ironing needn't take an age!
